Professional Summary

Backend Software Engineer with 1+ year of experience building scalable microservices, secure REST APIs, cloud-native applications, and AI-powered agent systems using Java, Spring Boot, Python, AWS, and GCP. Experienced in developing AI agents with LangGraph/LangChain, MCP servers, LLM integrations, OAuth 2.0, JWT, RBAC, and cloud automation.

Work Experience (Software Product Development)

Software Engineer — Cloud Alpha Solutions June 2025 – Present

- Architected and delivered **∼50% of core backend services** for an enterprise multi-cloud platform from design to production.
- Built scalable **Spring Boot microservices and REST APIs**, applying clean architecture and improving system scalability by **40%**.
- Implemented secure authentication and authorization using **OAuth 2.0, JWT, refresh tokens, RBAC**, and secure inter-service communication.
- Developed **AI agent workflows using Python, LangGraph, and LangChain**, integrating LLMs with backend APIs and cloud services for automated cloud operations.
- Built custom **Model Context Protocol (MCP) servers** to securely expose backend and cloud capabilities as tools for AI agents.
- Integrated **AWS, Azure, and GCP** services and automated cloud operations using IAM Roles, STS AssumeRole, and provider-specific SDKs.
- Built ETL pipelines using **AWS Glue, Athena, Crawlers, and MySQL** for automated cloud cost reporting.

Projects

AI Agent MCP Platform GitHub *Tech Stack:* Python, LangGraph, LangChain, MCP, LLMs, FastAPI

- Built agentic workflows using **LangGraph and LangChain** to plan, execute, and orchestrate multi-step cloud operations.
- Developed custom **MCP servers** exposing cloud and backend capabilities as secure tools for LLM-powered agents.
- Integrated AI agents with **Spring Boot REST APIs and cloud services**.
- Implemented **OAuth 2.0/JWT-based authentication and token validation** for securing MCP and AI-agent interactions.

Multi-Cloud Cost Monitoring System GitHub *Tech Stack:* Next.js, Spring Boot, AWS STS, GCP Billing API

- Built a full-stack cloud cost monitoring platform using **Next.js and Spring Boot.**
- Designed provider-agnostic REST APIs and secure cross-account AWS access using **STS AssumeRole.**
- Built provider-agnostic billing aggregation services supporting **AWS and GCP** with extensible REST APIs.

Education

B.E. Computer Science and Engineering **2021 – 2025**
Maria College of Engineering and Technology, Affiliated to Anna University CGPA: 8.5/10

Achievements

- Solved **600+ Data Structures and Algorithms problems** on GeeksforGeeks.
- Institute Rank **1** on GeeksforGeeks Coding Platform.

Skills

Languages	Java, Python, JavaScript, TypeScript
Backend	Spring Boot, Spring Security, REST APIs, Microservices, MySQL
AI / Cloud	LangGraph, LangChain, MCP, LLMs, AWS, GCP, Azure, Docker, OAuth 2.0, JWT, RBAC
